Fluso

PRODUCT BRIEF
PARTNERS / CUSTOMERS / INVESTORS

AI workspaces for teams with too much context.

Fluso connects to work apps, remembers project history, and turns scattered communication into tasks, research, files, and finished work.

Core capabilities

01

Connected work context

Search and use Gmail, Calendar, Drive, Slack, GitHub, Linear, web research, files, meetings, and project history.

02

Business context memory

A private operating memory of people, projects, decisions, files, meetings, deadlines, and source-linked evidence.

03

Proactive task detection

Finds open loops in messages and meetings: follow-ups, approvals, waiting items, deadlines, and recurring work.

04

Custom skills

Package repeatable team workflows for research, reporting, analysis, follow-ups, operations, and specialist work.

05

DOC PDF XLS PPT MD

Artifact generation

Create research briefs, reports, documents, spreadsheets, presentations, drafts, tickets, and project files.

06

Automations

Schedule recurring checks, summaries, reminders, meeting follow-ups, monitoring, and preparation workflows.

Use cases

PROFESSIONAL SERVICES

Client context to deliverable

Turn meetings, files, inbox threads, and research into proposals, recaps, decks, reports, and next-step plans.

INVESTORS

Diligence memo prep

Collect company context, market notes, meeting history, open questions, and source-linked evidence.

CUSTOMER TEAMS

Account follow-up

Summarize history, draft renewal notes, surface risks, and prepare personalized customer follow-ups.

PRODUCT TEAMS

Feedback to spec

Convert customer calls, Slack threads, tickets, and roadmap discussion into specs and release notes.

OPERATIONS

Open-loop tracking

Detect waiting items, approvals, vendor updates, escalations, and recurring commitments across channels.

Industries

01 Banking and financial services

02 Healthcare operations

03 Manufacturing

04 Legal and compliance

05 Life sciences and research

06 Public sector and education

Privacy and deployment

Built for teams that need AI close to their data, infrastructure, and compliance boundaries.

OSS LLM

Powered by OSS models

Open-source model choices keep Fluso suitable for private work memories and controlled customer environments.

aws

On-premise / VPC deployable

Deploy inside the boundary that matters: on-premises, customer VPC, cloud tenant, or private infrastructure stack.

Prem infrastructure in Switzerland

European product and infrastructure posture for teams that care where their intelligence layer runs.
